

# Aleksandra STANCZAK

*Place in the sun,*

art & cartography research project (2010 – present)

The expression “place in the sun” recalls so many different meanings, not only in the context of the mapping.

Cartography is a mean of visualization of this battle, between different political, sociological or environmental forces, established on the mappemonde as countries. But most of all, it is a way to find the right place under many layers, to fight a place in the sun.

MAPPING THE PATH OR A DESTINY?,  
WORKSHOP SERIE 2017-2018

WORKSHOP ORGANIZED PRIOR TO ICC  
INTERNATIONAL CARTOGRAPHIC  
CONFERENCE, WASHINGTON DC

1-2 JULY 2017

Every journey is a way to re-discover ourselves. We literally grow mentally because of travelling, as our mind fulfils with new data and new connections between them. There are many ways to represent it visually. In my workshops I invite people to fold paper to focus on different moments during the journey or to catch the essence of our journey.
